

Xplore Email using the Gmail App on an Android device

Changing your Settings

1. Open the **Gmail** app using the icon

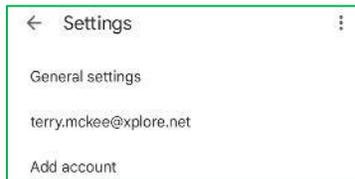

2. Tap the **three horizontal bars** at the top left

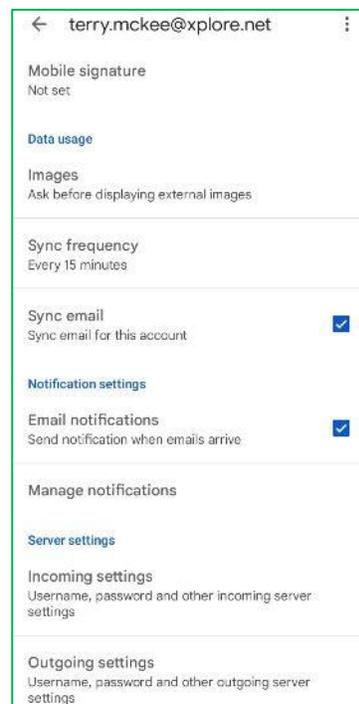

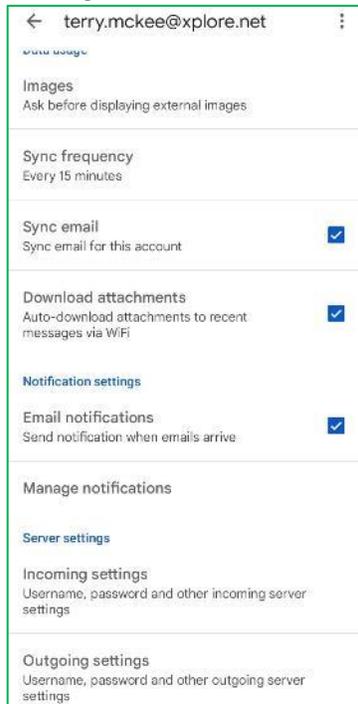

3. Scroll down to the bottom (if necessary) and tap **Settings** (gear icon)

4. Tap your **Xplore email address**

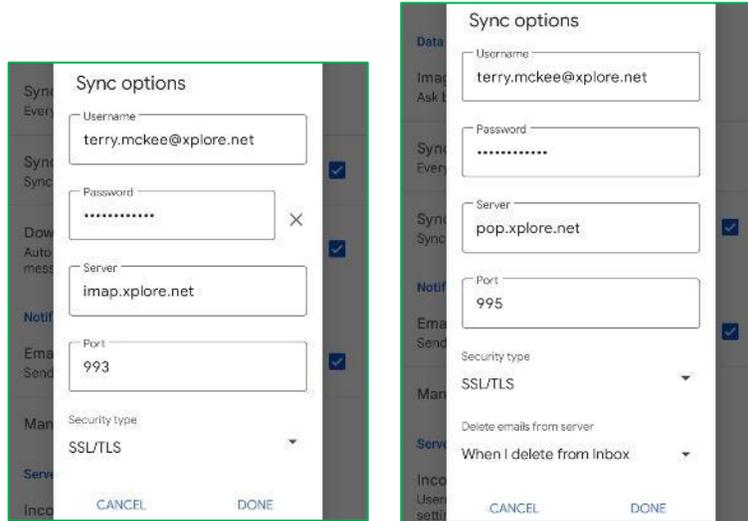

5. Scroll down and note what is listed **immediately above Notification settings**:
 - a. If **Download attachments**, then it's using **IMAP**
 - b. If **Sync email**, then it's using **POP**

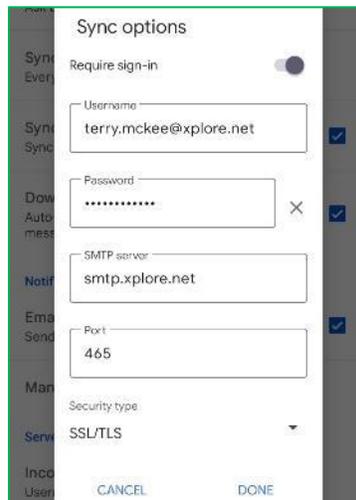

6. Under **Server settings**, tap **Incoming settings**.

- a. Scroll to the bottom (if necessary). If it has the option for **Delete emails from server**, then it's using **POP**; otherwise it's using **IMAP**

7. Verify the following settings, and change them if necessary:
 - a. **User Name:** your **full email address**, including the portion after the @ symbol
 - b. **Password:** your email password
 - c. **Server**
 - i. If it's using **IMAP**, **Incoming mail server: imap.xplore.net**
 - ii. If it's using **POP**, **Incoming mail server: pop.xplore.net**
 - d. **Port**
 - i. If **IMAP**: **993**
 - ii. If **POP**: **995**
 - e. **Server type: SSL/TLS**
 - f. Tap **Done**
8. Tap **Outgoing settings**. Verify the following settings, and change them if necessary:
 - a. **User Name:** your **full email address**, including the portion after the @ symbol
 - b. **Password:** your email password
 - c. **SMTP server: smtp.xplore.net**
 - d. **Port: 465**
 - e. **Server type: SSL/TLS**

f. Tap **Done**

9. Tap the **left arrow** ← at the top next to your email address

10. Tap the **left arrow** ← at the top of the Settings screen
