

Xplore Email on an Apple iOS Device using the Outlook App

Adding a new email account to your iOS device to use with the Outlook app:

1. From your Home Screen or the appropriate folder, tap the **Outlook** icon

2. First time using Outlook for iOS? Just tap **Get Started**.
 - a. If not, tap your **initials** or profile pic in the upper left corner.
 - b. Tap **Settings** at the bottom left (gear icon) > **Add Mail Account**.

Add Mail Account

3. Type your **full email address**, then tap **Add Account**
4. Do **not** tap “Not IMAP”, as **IMAP** is recommended.
5. Enter your email **Password** and a **Display Name**, then tap **Sign In**

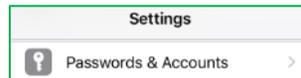

Your email account is now ready for use in Outlook on your iOS device.

To Sync your [Webmail](#) Address Book Contacts to your iOS device

1. From your Home Screen or the appropriate folder, tap the **Settings** icon

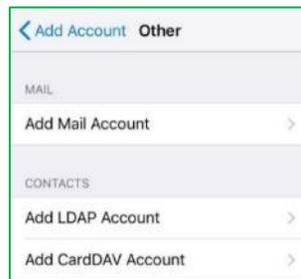

2. Scroll down and tap **Passwords & Accounts**

3. Under **Accounts**, tap **Add Account**
4. Choose **Other**

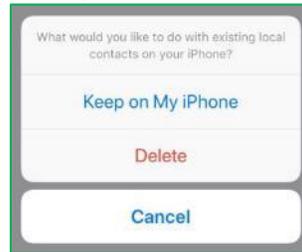

5. Under **Contacts**, tap **Add CardDAV Account**

6. For **Server** enter **mail.xplore.net**
7. For **User Name** enter your **full email address**
8. For **Password** enter your **email password**

9. Enter whatever you like in the **Description** field. It will be auto-populated with what was entered in the Server field
10. Tap **Next**
11. If it asks you “**What would you like to do with existing local contacts**” tap **Keep on My [iOS device]**

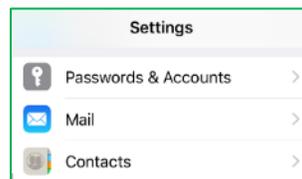

If you wish to make your webmail Contacts as the **Default Contacts** on your iOS device, such that when you add a new contact on your iOS device, it will save it in your webmail Contacts too, do the following:

1. From your Home Screen or the appropriate folder, tap the **Settings** icon

2. Scroll down and tap **Contacts**

3. Tap **Default Account**

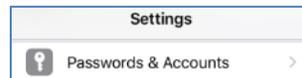

4. Tap your **Contacts** account (either by the Description you have for it, or “My CardDAV Account” if you left the Description blank)

To Sync your [Webmail Calendar](#) to your iOS device

1. From your Home Screen or the appropriate folder, tap the **Settings** icon

2. Scroll down and tap **Passwords & Accounts**

3. Under **Accounts**, tap **Add Account**

4. Choose **Other**

5. Under **Calendars** tap **Add CalDAV Account**

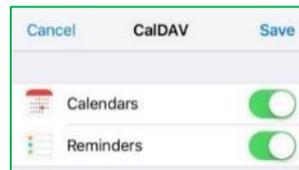

6. For **Server** enter **mail.xplore.net**

7. For **User Name** enter your **full email address**

8. For **Password** enter your **email password**

9. Enter whatever you like in the **Description** field. It will be auto-populated with what was entered in the Server field

10. Tap **Next**

11. Tap **Save**

Changing your Email Password

If you **changed your email password** in [webmail](#) or [MyXplore](#), you will need to change it in Outlook and Settings to match the new password.

For your email account in the Outlook app:

Outlook for iOS may detect a sync error and ask you to “Please sign in to your IMAP account”.

1. Tap **Sign in**

2. Enter the new **Password** you set in webmail or MyXplore and then tap **Sign In**

If Outlook doesn't prompt you, follow these steps instead:

1. From your Home Screen or the appropriate folder, tap the **Outlook** icon

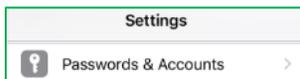

2. Tap your **initials** or profile pic in the upper left corner
3. Tap **Settings** at the bottom left (gear icon)
4. Tap the **Mail Account**
5. Tap **Edit Login Information**
6. Enter the new **Password** you set in webmail or MyXplore and then tap **Sign In**

For your **sync'd Webmail Contacts**:

1. From your Home Screen or the appropriate folder, tap the **Settings** icon

2. Scroll down and tap **Passwords & Accounts**

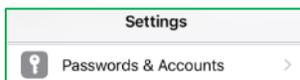

3. Under **Accounts**, tap your **Contacts** account (either by the Description you have for it or “My CardDAV Account” if you left the Description blank)
4. Enter the new **Password** you set in webmail or MyXplore and then tap **Done**
 - a. If you entered the password incorrectly, it will give error “Cannot Connect using SSL”
 - b. Tap **Cancel** and then **OK**, and try entering the correct password again
5. It will return to **Passwords & Accounts** once changed successfully

For your **sync'd Webmail Calendar**:

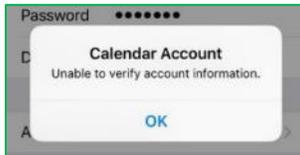

1. From your Home Screen or the appropriate folder, tap the **Settings** icon

2. Scroll down and tap **Passwords & Accounts**

3. Under **Accounts**, tap your **Calendar** (or **Calendar, Reminders**) account (either by the Description you have for it or “My CalDAV Account” if you left the Description blank)
4. Tap your **Account** under **CALDAV**
5. Enter the new **Password** you set in webmail or MyXplore and then tap **Done**
 - a. If you entered the password incorrectly, it will give error “Cannot Connect using SSL”
 - b. Tap **Cancel** and then **OK**, and try entering the correct password again

6. It will return to **CALDAV** screen once changed successfully

Your password is now changed to match what you set it to in webmail or MyXplore.
